Over four years of experience as a full-stack web and blockchain developer. I currently work at Guarapo as part of the blockchain team, developing smart contracts to create dApps. I also have experience at Dazlabas and Personal Class as a full-stack and blockchain developer, where I participated in web application development.

PROFESSIONAL EXPERIENCE

Guarapo

Colombia, Barranquilla

Full Stack & Blockchain

October 2025 - Actualidad

- Development of a decentralized application, using Web3 for connection with the smart contract.
- Creation, optimization and implementation of “Smarte Contrat” for token creation and transactions.
- Application of best practices to maintain traceability, security and efficiency in decentralized operations.
- Utilizing Rust, Solana, and Anchor as core technologies to leverage their high performance, security, and cost efficiency.

Dazlabs

Caracas, Venezuela

Full Stack & Blockchain

July 2023 – September 2025

- Development of decentralized applications with different Blockchain functionalities.
- Implementation of microservices with Blockchain functionality to improve traceability, security and efficiency in decentralized operations.
- Design of standardized and customized Smart Contracts to automate processes, ensure transaction security, and adapt to the specific requirements of each project.
- Implementation of Ganache to simulate local blockchain environments; facilitating the development, testing, and debugging of smart contracts before their deployment on public networks.

Personal Class

Huancayo, Perú Desarrollador FullStack

August 2022 – April 2023

- Development of a web application with functionalities to teach courses online.
- Implementation of services such as Cloudinary, JWT, and Stripe to create a robust, secure, and functional API, integrating media storage, authentication, and payment gateway..
- Tutor of the pilot course called “Programming from zero”.

EDUCATION

CERVANTES INSTITUTION

Córdoba, Argentina

2024

Systems Analyst. Computer systems design and development studio. computer systems.

CONQUER BLOCK

Master in Blockchain. Training focused on the creation of Smart Contracts and dApps.

Online
2024

Henrry

Full Stack Web Developer. Training focused on creating web apps.

Online
2022

ADDITIONAL SKILLS

- Technologies: Expert in JavaScript, TypeScript (React, Next, Angular, Node, Nest); advanced in Solidity (Web3, Hardhat), Rust, Solana, Anchor; basic knowledge of Java (Spring Boot). Regarding mobile applications: Advanced in React Native.
- Physical Education Teacher, which has given me teaching and communication skills to transmit knowledge clearly and effectively.
- Native Spanish speaker. Intermediate English speaker.
